

Summary

Cornerstone Capability Consultants supports prime contractors and large firms by delivering IT project management, technical writing, and process improvement services through flexible staff augmentation or defined project engagements. We provide the expertise and professionalism you need to exceed your clients' expectations.

Core Competencies

- **IT Project Management** - End-to-end project leadership across the full lifecycle using Agile and hybrid methodologies
- **Technical Writing & Documentation** - Development of SOPs, user guides, system documentation, and compliance materials
- **Business Process Improvement** - Lean-based assessments, value stream mapping, and workflow optimization

Differentiators

- **People, Process, Technology Focus** - We don't just manage projects—we align people, process, and technology to deliver real business value.
- **Experience Leading Complex Government and Private-Sector Projects** - Proven success implementing enterprise-level PMO structures, compliance frameworks, and agile transformations.
- **Speed and Flexibility** - We move fast, adapt quickly, and provide direct access to senior consultants—no bloated layers of management.

Highlights

- **State Government Agency – Project Portfolio Management Office (PPMO) Establishment** - Led the formation of a PPMO by defining needs, hiring key personnel, creating a live project portfolio, and coordinating vendors—delivered on time and within budget.
- **Agile Transformation of IT Function** - Oversaw a complete reorganization from siloed teams to agile delivery, launching 12+ teams into active sprints and enabling value delivery every two weeks across departments.
- **Quality Management System Redesign** - Guided a 3.5-year transformation of the QMS to align with business needs while ensuring compliance—resulted in 12-week time savings and reduction of required headcount by 10+ during software projects.
